Subject: Microsoft Settlement

I strongly support the acceptance of the current settlement between the DOJ and Microsoft. The DOJ and many states' Attorney General have, in my opinion, been unfair and extreme in their targeting of Microsoft in pursuit of political goals. I work in the technology industry. I use products of Microsoft's competitors as well as Microsoft. I will use the product that I feel is the best for what I want to accomplish. Microsoft has been innovative with it's products and has marketed them with business savvy. It is unfair to allow it's whining competitors to use the government to stymie competition and artificially alter the effects of the free market. The settlement currently being considered is FAR MORE than fair in righting any technical errors made on the part of Microsoft. For the sake of the US economy and the welfare of innovation and our economic viability and sovereignty in the world, this harassment must stop.
